# Tabellen zur Ermittlung der IV-Taggelder

## Tables pour la fixation des indemnités journalières AI

---

Gültig ab 1. Januar 2022  
Valable dès le 1<sup>er</sup> janvier 2022

### **Erläuterungen:**

Das Taggeld besteht aus einer Grundentschädigung und dem Kindergeld für Personen mit Kindern. Gegebenenfalls ist das Taggeld noch zu kürzen, falls die invalide Person während der Eingliederung ein Erwerbseinkommen, ein Taggeld der ALV oder eine IV-Rente bezieht.

**Vom (gekürzten) Taggeld ist ein maximaler Abzug bei versicherten Personen mit Kindern von 10 bzw. ohne Kinder von 20 Franken zu machen, wenn die IV vollumfänglich für Verpflegung und Unterkunft aufkommt.**

Für das Taggeld von Personen in der erstmaligen beruflichen Ausbildung und in gleichgestellten Fällen gelten andere Berechnungsarten.

Liegt das massgebende Einkommen zwischen zwei in der Tabelle enthaltenen Werten, so wird das dem nächst höheren Ansatz entsprechende Taggeld ausgerichtet.

### **Explications:**

L'indemnité journalière est constituée d'une indemnité de base et de l'allocation pour enfants pour une personne avec des enfants. Le cas échéant, il faudra encore réduire l'indemnité journalière si la personne invalide reçoit un salaire, une indemnité journalière de l'AC ou une rente AI pendant la réadaptation.

**Un montant maximal de 10 francs resp. de 20 francs pour les personnes assurées ayant des obligations resp. sans obligations d'entretien envers des enfants doit être déduit de l'indemnité journalière (réduite), si l'AI prend entièrement en charge la nourriture et le logement.**

Pour le calcul de l'indemnité journalière allouée aux personnes pendant la formation professionnelle initiale ou dans les cas qui y sont assimilés, on utilise d'autres règles.

Si le revenu déterminant se trouve entre deux taux du barème, c'est le taux le plus élevé qui sera pris en considération.
